SUMMARY

B.Tech student specializing in Artificial Intelligence & Data Science with strong foundations in Data Analysis, Machine Learning, and Python programming. Experienced in Exploratory Data Analysis (EDA), SQL queries, data visualization using Matplotlib and Seaborn, and building real-time web applications using REST APIs. Proficient in Data Structures, Algorithms, and object-oriented programming with strong analytical and problem-solving abilities. Seeking a Data Analyst or Data Science internship where I can apply machine learning models, data analysis techniques, and backend development skills to solve real-world business problems

EDUCATION

B.Tech in Artificial Intelligence & Data Science
Amrita Vishwa Vidyapeetham • Amritapuri, Kerala • 2028 • 9.06

Intermediate
Resonance Junior College • 2024

Secondary Education
SVV EM High School • 2022

SKILLS

- **Programming Languages:** Python Programming, Java, SQL Queries
- **Data Analysis & Visualization:** Pandas, NumPy, Matplotlib, Seaborn, Excel
- **Core Concepts:** Data Structures, Algorithms, OOP, Machine Learning Basics
- **Databases:** MySQL (Joins, Aggregations, Queries)
- **Tools & Platforms:** Git, GitHub, Jupyter Notebook, Google Colab, VS Code, MATLAB
- **Web Development:** HTML , CSS, Java Script
- **Web & APIs:** REST APIs, Map APIs , OpenCV
- **Soft Skills:** Problem Solving ,Analytical Thinking ,Leadership ,Communication ,Team Collaboration

PROJECT

Safe Route Planning Web Application
github.com/SKasiViswanadham/Safe-Maps • December 2025 - January 2026
- **Tech Stack:** Python, REST APIs, Map APIs, Geolocation
- Developed a real-time route planning web application integrating REST APIs and geolocation tracking.
- Implemented dynamic path visualization using Map APIs to generate optimized navigation routes.
- Designed backend logic to process live location data and enhance route decision-making efficiency.

QR-Based Restaurant Food Ordering System
github.com/SKasiViswanadham/QR-Based-Restaurant-Food-Ordering-System • April 2024 - May 2025
- **Tech Stack:** Java, Swing, MySQL, Object-Oriented Programming
- Built a QR-based digital ordering system enabling menu browsing, order placement, and automated bill generation.
- Designed backend modules for order management and database integration using MySQL.
- Applied object-oriented programming principles to develop a modular and scalable system architecture.

Gesture Keyboard Search
github.com/SKasiViswanadham/Virtual-Keyboard • February 2025 - March 2025
- **Tech Stack:** Python, MediaPipe, OpenCV
- Developed a gesture-controlled virtual keyboard using computer vision techniques for hands-free interaction.
- Implemented real-time hand landmark detection and gesture recognition using MediaPipe and OpenCV.
- Optimized gesture detection performance through threshold tuning and algorithm refinement.
- **Web & APIs:** REST APIs, Map APIs , OpenCV

CERTIFICATIONS

Machine Learning for Data Science Projects
IBM SkillsBuild • 2026

- Completed hands-on training in applying machine learning algorithms, model evaluation techniques, and data science workflows to real-world.

Deep Learning in Python
DataCamp • 2026

- Gained practical experience in neural networks, backpropagation, and implementing deep learning models using Python.

Technology Job Simulation
Deloitte (Forage) • 2025

- Completed simulated industry tasks involving coding, development, and real-world technology consulting workflows.

Introduction to Linear Algebra with MATLAB
MathWorks • 2025

- Strengthened mathematical foundations in vectors, matrices, and linear transformations essential for machine learning applications.

TECHNICAL ACTIVITIES

UIDAI HACKATHON 2026 – Participant

- Participated in a national-level technology hackathon focused on digital identity solutions.
- Collaborated in a team-based environment to prototype a functional solution.
- Results awaited.

CMR HackFest 3.0 – Participant

- Participated in a competitive hackathon emphasizing rapid problem-solving and application development.
